EDUCATION

AMITR College of Engineering

Bachelor of Engineering, Computer Engineering

2021 – 2024

University of Mumbai

EXPERIENCE

Solverix Technologies Pvt. Ltd.

Feb 2026 – Present

MERN Full Stack Developer

Mumbai, IN

- Built a production-grade **Factory Dispatch Automation System** using **React.js**, **Node.js**, **Express.js**, and **PostgreSQL**.
- Designed scalable REST APIs and PostgreSQL schemas with **Prisma ORM**.
- Developed React dashboards with role-based workflows and real-time dispatch tracking.
- Integrated **Docker** deployment and IoT devices for automated factory operations.

Videowaves

Dec 2024 – Feb 2026

Software Developer

Mumbai, IN

- Implemented secure **JWT** authentication and **RBAC** for enterprise applications.
- Developed backend services and integrated REST APIs to automate business workflows.
- Documented and tested APIs using **Swagger** and **Postman**.

Cuvette

July 2024 – Nov 2024

Front-end Developer

Remote

- Optimized front-end assets, improving website performance and reducing page load time by **30%**.
- Developed responsive user interfaces for mobile, tablet, and desktop using modern frontend technologies.
- Integrated **REST APIs** to build dynamic and data-driven web applications.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, SQL, HTML, CSS

Frameworks & Libraries : React.js, Node.js, Express.js, NestJS, Redux Toolkit, Tailwind CSS

Databases : PostgreSQL, MongoDB, Prisma ORM, Mongoose, Redis

Developer Tools : Git, GitHub, Docker, Postman, Swagger, Redis, VS Code

PROJECTS

Factory Dispatch Automation System | React.js, Express.js, PostgreSQL | [GitHub](#)

2026

- Engineered a production-grade factory automation platform to streamline bundle scanning, stable weight capture, label generation, and dispatch workflows.
- Developed responsive **React.js** dashboards and scalable **Node.js/Express.js** REST APIs for real-time factory operations and role-based access control.
- Integrated IoT-enabled digital scales and ZPL printers with simulation support, enabling automated weight validation and label printing.
- Designed PostgreSQL database models using **Prisma ORM** and adopted a monorepo architecture to improve scalability and maintainability.

Koniwala Matrimonials CRM | NestJS, React, PostgreSQL, Prisma, Redis | [Github](#)

2026

- Built a production-ready CRM for matrimonial organizations, automating member onboarding and profile management.
- Developed AI-assisted profile matching, WhatsApp profile capture, and HR attendance management modules.
- Designed PostgreSQL database models using Prisma ORM and implemented scalable REST APIs with NestJS.
- Integrated Redis and BullMQ for background job processing and asynchronous workflow automation.

Aadhaar Voting System | Blockchain, React, Node.js, OTP Authentication | [GitHub](#)

2024

- Built a blockchain-based voting platform ensuring secure vote recording and one-vote-per-user validation.
- Implemented Aadhaar-linked OTP authentication with automated voter eligibility verification.
- Developed a responsive voting interface with dynamic candidate management and secure vote submission.
